

Belgrade, Serbia – September 25th-27th, 2015

Participants' Proposals

I would like to propose...

1.	I want you to bring in <u>younger persons</u> in the field to have workshops. People who shall have workshops <u>must</u> talk English so that we understand. I hope all workshops will be digitalized on our homepage.
2.	I can't. Everything was OK.
3.	That the interchange portion be given more time/space. That people be encouraged to really give a <u>flavor</u> of the experience with more reflections. I find the questions reporters were given limited, compared with those the reporters were given the other time I participated in EFTA-TIC in Toulouse. I realize <u>some</u> form may be helpful, but I would like to see this given more thought.
4.	-
5.	Maintain the structure!! And: Both-And presentations. Also <u>theory</u> , not only practice.
6.	More illustrative materials.
7.	Keep on with the good work! ☺ Be proud of what you have achieved by arranging this conference!
8.	I would like to suggest that presenters who don't know English would be provided with a translator found among colleagues who would be happy to help.
9.	-
10.	Better people division in the workshops (some had 20, others had 7). EFTA could be ore open and active with trainees as well.
11.	Keep going please! It was my first meeting and I'm planning to come back every time.
12.	From a perspective of a trainee, I would like to propose more trainees in those meetings because I think the conversations about different ways of teaching is lacking a big part if you don't have an opinion about different ways of learning.
13.	The intensity of work was very high, it would be perfect if the meeting lasted 5 days.
14.	That the organizer doesn't make any changes in the agenda after the EFTA-TIC program has started.
15.	I do not have anything to propose at this moment.
16.	It will be really nice we can take the power point presentations from workshops if it is possible.

Participants' Proposals

I would like to propose...

17.	To have more, regular EFTA events in the Balkan region – our societies and unstable political circumstances, mixed, often conflicting, discourses about gender, generations, human rights, minorities, etc., all this is a context where international professionals can learn a lot, not only contribute with their knowledge, research and expertise, but also learn from our social processes here and, thus be able to transfer knowledge to their societies which also happened to be facing major changes in the last couple of decades. Balkan's social processes are a suitable background of the need for us, the systemic thinkers to re-evaluation of our conceptualizations and develop further understanding of the human relations (i.e. we saw how sensitive everybody instantly was at the view from the convenient hotel room to the groups of people, children, whole families, sleeping outside in the cold and this theme could outvoice all the others...).
18.	Maybe a small change/ a difference in the evaluation form.
19.	-
20.	The programme was a bit crowded, too many things happening at the same time, but I guess that's understandable. Inter-workshop exchange should take place at the time when it is planned.
21.	That also the organizers and the committee members would attend the sessions and actively participate to the process. Their being "obliged" to attend specific focused meetings, even if they were held also for the sake of our organization and our further progress, has disrupted a little the corality of our being-together.
